Budd says he believes Worden guilty and affidavits won't save him....Two men capsized in San Francisco Bay.

**At Large—Pages 1, 2.**

Dispatches were also received from West Point, N. Y.; Salt Lake, Detroit, Chicago, Milwaukee, London, Washington, and other places.

**Weather Forecast.**

**SAN FRANCISCO**, May 30.—For Southern California: Fair Monday, fresh westerly winds.

**Postmen Still Out.**

NEW YORK, May 30.—The big strike of postmen-makers entered its second week today. About 2500 operators whose employers have signed the new agreement have returned to work, leaving about 24,000 yet on strike, and their leader expressed himself as satisfied that the operators would return to work under the old conditions, the meeting.

**Protest Against Sunday Ball.**

**SYRACUSE** (N. Y.), May 30.—A mass-meeting held tonight to protest against Sunday baseball players. The platform was filled with prominent business men and professional citizens. Addresses were made, and a committee appointed to carry out the purposes of the meeting.

It was only a short time ago that a name was submitted for postmaster

## FAST TALKERS

Skimming Right Along  
on the Tariff.

The Progress Made Phenomenal  
as Debates Go.

More Bitterness in Sugar Than  
Other Schedules.

Democrats Collecting Their Tin  
Thunder—Hawaiian Treaty Will  
Probably be Continued in Effect.  
Efforts to Harass Mr. Reed.

[BY ASSOCIATED PRESS WIRE]  
WASHINGTON, May 30.—The impression was general about the Senate at the close of the first week's discussion of the tariff yesterday, that the sugar schedule would reach toward the close of the present week. The progress so far made, while it was much less marked yesterday than on previous days, is generally regarded as little less than phenomenal as modern tariff debates go. Senator Vest probably concedes that good progress has been made, but they are not inclined to felicitate themselves too much until they see what policy is to be pursued when questions of more general interest are reached than have yet been broached.

The sugar schedule, in all probability, will excite more prolonged and animated debate than any other in the bill. The Democrats are making every preparation for the discussion of this schedule and several set speeches will be made upon it. The indications are that various other questions of general interest will be considered, especially with the sugar duty. Senator Pettigrew is continuing the presentation of his amendment against trusts in this connection, and it is certain that the Hawaiian question will come to the front in an effort to bring about the continuance of the reciprocity treaty with the Hawaiian Islands.

With reference to the Hawaiian treaty, there is no longer much room for doubt that that provision will be made concerning the present treaty in effect.

It is probable that the present treaty will be done by a direct declaration that nothing in the bill shall be construed as abrogating the treaty. The Republican members of the committee are contemplating this change.

There is little likelihood of the bill being passed after the conclusion of that under present discussion before the sugar schedule can be reached. There are the metal and wool schedules.

The metal schedule is not especially obnoxious to the Democrats, containing as it does nothing that can be construed as being particularly objectionable.

(COAST RECORD.)

**RUSH FOR THE JAIL****MOB WELCOMES PARKER ON HIS RETURN TO PRESCOTT.**

**Forger Miller Accompanies the Trainrobber and the Lawyer Curises Him as a Coward.**

**BOTH MEN AGAIN BEHIND BARS****THE MURDERER THIRSTY FOR THE SHERIFF'S GORE.**

**Mrs. Rice's Grave Desecrated at Jackson-San Quentin Convicts Still Threatening Trouble. Budd Dooms Durrant.**

(BY ASSOCIATED PRESS WIRE) PRESCOTT (Ariz.) May 30.—Train-robber and Murderer Jim Parker and Forger L. C. Miller were again locked in jail here this morning, a little after midnight, whence they escaped three weeks ago today. They were brought from Flagstaff by Sheriff Ruffner of that county, and Cameron of County Coconino. A big crowd, attracted by excitement gathered at the depot to see the desperadoes, but as a precaution against any trouble, the train stopped near Whipple, where carriages were waiting, in which the prisoners were hustled and driven rapidly to jail.

The crowd became aware of the move, and a rush was made to the jail before they arrived. Miller seemed badly frightened, anticipating being taken by the crowd, but Parker, with a volley of oaths and obscenity, upbraided him for his cowardice. Parker acted the part of a brave, and asked the officers to drive them around town for a little fresh air.

Parker manifests great hostility to Sheriff Ruffner, and expressed regret at being unable to kill him. He told Cameron that he would not hang nor would he be in coitus with the warden if there was time.

In the first trial, the officers, among the defense, Parker was shot in the leg below the knee. The wound was slight, and is now healed. He says the Mexican was shot through the fleshly part of the thigh, and more seriously wounded. Both of the returning fugitives, and Thomas C. Rogers, charged with complicity in the train-robbery, were heavily ironed this morning, and will be kept in this county till their cases are disposed of in court.

Parker is more sullen and obstinate than before, and refuses to talk. He boasts, however, that had Sheriff Ruffner not found them when he did on the way to Flagstaff, he would have escaped from his captors within another hour. The court meets this from tomorrow, when the cases will be tried.

**DURRANT MUST HANG.**

**Gov. Budd Orders the Death Watch to Be Placed.**

(BY ASSOCIATED PRESS WIRE) SACRAMENTO, May 30.—Theodore Durrant will hang on June 11, one thousand feet above the ground, according to a joint resolution of the committees of correspondence of the departments of the work, which was held in executive session. At 10 o'clock a platform was given to the delegates for the Thompsons have concluded not to start Requital, his work since his defeat by Handspring being unsatisfactory. He reported that Handspring would be among the missing and ignorantly denied by P. J. Dwyer, who states that his colt's condition is entirely satisfactory, his work being the best of the year, and Simms will pilot him.

Drs. Sasseles and Gall were called to find out the motives of the disturbers and the extent of the interference. A hurried and partial examination revealed no evidence that the body had been opened or any part of it removed. The deceased was 32 years of age and died from a combination of disease which required medical attendance. Altogether the case is a mystery, the unearthing of the remains showing no motive for desecration. This is the second case within a few months.

STRUCTED to instantly suppress any attempts at organized disturbance.

The regular guard force here today some of the convicts not implicated in the strike, but sympathizing with its leaders, bolted the doors of the dungeon where the men on short rations are confined, with the result that all of them got out in this way managed to give them considerable food before the very eyes of the keepers. Shouting and banging on the doors was continued all day, and those within hearing distance were greeted with the wildest laughter. The inmates declare they will never submit to the discipline again, and the prison officials are freely aware that it will be a difficult task to restore tranquility.

Warden Hale declares that there is no foundation in fact for the complaints regarding the quality of food served. He thinks this charge is merely a pretext for the convicts refusing to work in the kitchen, and posting themselves about, but, having quelled the first outbreak, he is now master of the situation.

LATER: "Shoot the first man who breaks out of his cell," that was the order to the guards at San Quentin night. The prisoners were striking like maniacs, and rattling and pounding on the iron doors of their cells. The guards were doubled, and each carried a shotgun loaded with buckshot.

Two men, who were released today, their terms having expired, told what the desperate convicts are planning. It has been agreed among the ringleaders that when they are permitted to return to work in the jute mills they will make a sudden raid and kill together Young, if necessary, overpower the guards, and completely wreck the magnificent plant, on which an enormous amount of money, said to be nearly \$1,000,000, has been spent. The majority of the such names that it could very soon be damaged and probably destroyed, but the convicts are worked up to such a pitch that they would stop at nothing. There are 1364 prisoners within the walls at San Quentin. Over half of them are in open revolt. Many of the others sympathize with the violent ones.

Yesterday afternoon Gov. Budd telephoned to Warden Hale requesting advice as to the exact situation at the prison. The Governor was anxious if there was any chance of a fall-through. The warden replied that the situation was improving, and informed the Governor that the men were all safely locked up, and that in his judgment, there was not the slightest chance for a single prisoner to escape.

Gov. Budd did not make any suggestions as to what course the warden should pursue, but left everything with Hale, telling him that he would back him to the end, but would send word if necessary. The warden admits that all the complaints made by the men are trivial. Director Wilkins declares that they have no real grievance.

Prison Surgeon Lawler says that the onus fidei who have been deprived of the drug are at the bottom of the trouble.

**A DESECRATED GRAVE.**

**The Mysterious Case of Mrs. Rice and Its Developments.**

(BY ASSOCIATED PRESS WIRE)

JACKSON, May 30.—This morning it was noticed that the grave of Mrs. Rice, who was buried in the public cemetery here last Wednesday, had been disturbed. The gloves of the pallbearers, which had been thrown upon the casket at the funeral, were found on the surface, and other indications pointed to the conclusion that the grave had been opened. The relatives were informed, and they notified the Sheriff's office.

The grave was reopened today, and all doubt that ghouls had been at work was dispelled. The outer box containing the casket was found broken. The cover of the casket had been lifted, one screw being missing and others being found in different positions to that in which they were placed.

The corse was there, however, but the presence of dirt inside the coffin showed that it had been disturbed.

Drs. Sasseles and Gall were called to find out the motives of the disturbers and the extent of the interference. A hurried and partial examination revealed no evidence that the body had been opened or any part of it removed. The deceased was 32 years of age and died from a combination of disease which required medical attendance. Altogether the case is a mystery, the unearthing of the remains showing no motive for desecration. This is the second case within a few months.

**STUDENTS' CONFERENCE.**

**Last Day of the Gathering at Pacific Grove.**

(BY ASSOCIATED PRESS WIRE)

PACIFIC GROVE, May 30.—The last day of the Pacific Coast Students' Conference began its session with a joint meeting of the students of the various departments of the work, which was held in executive session. At 10 o'clock a platform was given to the delegates for the Thompsons have concluded not to start Requital, his work since his defeat by Handspring being unsatisfactory. He reported that Handspring would be among the missing and ignorantly denied by P. J. Dwyer, who states that his colt's condition is entirely satisfactory, his work being the best of the year, and Simms will pilot him.

Drs. Sasseles and Gall were called to find out the motives of the disturbers and the extent of the interference. **NEVADA CITY SYSTEM.**

**All Sorts of Rumors Afloat but no Definite Solution.**

(BY ASSOCIATED PRESS WIRE)

NEVADA CITY, May 30.—The cause of the death of Mrs. Gehrig by violence remains a mystery.

The majority of the people here think that it is a case of murder, and have frequently called for the trial of the Governor. In his annual remarks at the close of the conference the Governor said: "You are simply seeking another respite for the prisoner which I will not allow."

He had, he said, such astounding proofs of Worden's guilt that he doubted whether he had to prove an alibi, or anything else, could induce him to bring the guilty. Only a few days ago, he said, Worden had written letters for relatives in the East and these letters he (the Governor) now said that Worden stated that he knew that the Governor could not take steps for the commutation of his sentence, and that he would certainly be hanged.

In those letters, the Governor explained, Worden had asked forgiveness for his conduct for the blot he had placed on their names, and had warned his son not to follow in his footsteps. But nowhere did he make a denial of his guilt. In fact, he had admitted guilt in everything except words.

The Governor would not give the letters he held to the press, but he privately showed them to M. T. Knox and Crossley. What impression they made is not known. The hearing closed at 2:30 o'clock, and judging from the attitude taken by the Governor, nothing on earth can save Salter D. Worden from the gallows. He will give his decision tomorrow.

**SAN QUENTIN RIOTERS.**

**No Serious Trouble Yesterday, but Still Unruly—Threw Bread.**

(BY ASSOCIATED PRESS WIRE)

SAN FRANCISCO, May 30.—The riotous convicts in the San Quentin Penitentiary caused no serious trouble today, but they are still defiant and vaguely threaten that they will compel the authorities to yield to their demands. Warden Hale is confident that the backbone of the strike has been broken, and declares that he will soon starve the unruly men into subjection. They are closely watched every moment and the guards are in-

**SPORTING RECORD.****PICKED TEAMS PLAY.****ALL IN READINESS FOR THE CHESS CONTEST.**

**Manager Mareau of the Western Union Telegraph Co. Perfects the Communication.**

**FIRST GAME BEGINS TODAY.****BRITISHERS ENJOY ADVANTAGES OF SOME MOMENT.**

**Baseball at San Bernardino—The Colts Defeat the Champions—A Player Badly Spiked—Turner Fest at St. Louis.**

(BY ASSOCIATED PRESS WIRE)

WASHINGTON, May 30.—Some time was spent today by Manager Mareau of the Western Telegraph Company in perfecting arrangements for the transmission and reception of messages to and from the Washington office in connection with the international chess game between the picked teams of the House of Representatives and the British House of Commons, which will begin tomorrow at 2 o'clock Washington time.

The telegraph instruments have been put into the room occupied by the House Committee on Commerce, which is sufficiently commodious to comfortably accommodate the players, the telegraph officials and a few other persons who will be admitted. The office is in direct communication with Heart's Content; Nova Scotia, the American terminus of the Atlantic cable, and the messages exchanged today were dispatched by the Red Cross.

CINCINNATI—WASHINGTON. (CINCINNATI, O.) May 30.—The Senators made their first appearance here this season, and were defeated by the Reds in a slow and uninteresting game. Score: Cincinnati, 8; Reds, 12; errors, 3. Washington, 7; base hits, 12; errors, 3. Batteries—Breitstein, Rhines, and Schriver; King, German and McGuire. Umpire—Emmle.

**TURNERS AT ST. LOUIS.****Largest Festival in That District.**

(BY ASSOCIATED PRESS WIRE)

ST. LOUIS, May 30.—The combined Turners' organization of this city united at the fair grounds today for the largest festival in the history of the St. Louis district. Fine weather brought out an immense crowd, which was enabled to view some of the postponed events of the national turnfest held here during the early part of the month.

The messages exchanged today related to securing a mutual understanding of the form in which announcements were to be made. It was agreed that the five boards should be designated by numbers No. 1, No. 2, etc., and that the moves should be specified by numerical adjectives as first, second, etc.

Some of the members of the House who will represent the American end of the contest were also at the Capitol keeping an eye on the telegraphic proceedings and experimenting with new openings. While they are very hopeful of the outcome, they realize that their British antagonists enjoy many advantages over them, from greater practice as well as on other accounts.

**BROOKLYN HANDICAP.**

**Prospects for a Dozen Starters—The Present Favorites.**

(BY ASSOCIATED PRESS WIRE)

NEW YORK, May 30.—As far as could be learned there is every probability of a dozen starters in the Brooklyn Handicap, to be run at Gravesend tomorrow, and the owners and trainers profess to be well satisfied with the condition of their charges. The top weight, however, will be an absentee, for the Thompsons have concluded not to start Requital, his work since his defeat by Handspring being unsatisfactory.

He reported that Handspring would be among the missing and ignorantly denied by P. J. Dwyer, who states that his colt's condition is entirely satisfactory, his work being the best of the year, and Simms will pilot him.

**ANTHUSIASTIC STUDENTS.**

**Harvard Boys Daub the Statue of the Founder with Paint.**

(BY ASSOCIATED PRESS WIRE)

CAMBRIDGE (Mass.) May 30.—It was discovered this morning that the John Harvard statue, located on the delta of Memorial Hall, in the college yard at Harvard University, had been besmeared with red paint during the night, probably by students in Princeton's honor. The paint was daubed in patches, chiefly on the base of the granite foundation, and steps were promptly taken to remove it.

This is the second time within five years that the statue has been similarly treated.

**Annual Chicago Road Race.**

CHICAGO, May 30.—The eleventh annual Chicago road race, under the auspices of the Associated Cycling Clubs, will start tomorrow morning at 11 o'clock from the Wisconsin Central station one mile west of the White House. The course is nearly straight, and is within a few yards of twenty-five miles, the finish being made in Garfield Park. Four hundred and ninety-six entries have been accepted. Fair weather is promised and record-breaking is in order.

**Bull at San Bernardino.**

SAN BERNARDINO, May 30.—The Wilds of San Bernardino defeated the Cobus Examiner nine in a game of baseball today, by a score of 6 to 2. Scores by innings: Cobbs ..... 0 0 2 1 0 2 6 Wildlands ..... 0 1 2 1 1 3 8

There were 3500 people present.

**Hundred-yard Swimming Race.**

SANTA CRUZ, May 30.—A swimming race for the 100-yard champion of the Pacific Coast, between Clyde Hawthorne of Santa Cruz and O. Scoult of San Francisco, was won by Hawthorne, who has been champion for several years; time 1:15 1-5.

**FLASHES FROM THE WIRES.**

A. NASH, Tenn., dispatch says that Saturday, in the Criminal Court at Lebanon, he was sentenced to life imprisonment for killing his wife. He was sentenced to life imprisonment, but his wife, Morris Park, had been freed.

Nowell came to the city this evening for a high rise at Albuquerque, but that rise cannot reach El Paso before tomorrow night, when it will be too late to do damage. Houses in the flooded district are still falling. The Board of Health is colonizing all the destitute food sufferers at old Fort Bliss.

**OFFERED FOR RANSOM.**

(BY ASSOCIATED PRESS WIRE)

MANHATTAN BANK SECURITIES CAN BE HAD FOR COIN.

**Nineteen Years Ago They Were Stolen and Many of Them Are Worthless Now—President Bird Will not Give Fifty Thousand Dollars for Them.**

(BY ASSOCIATED PRESS WIRE)

NEW YORK, May 30.—Nineteen years ago the country was startled by the report of the biggest bank burglary known in the history of the world. It occurred Sunday, October 27, 1878. The Manhattan Savings Institution of this city was robbed of securities estimated at \$2,747,000 and \$10,000 in cash. With the exception of a few of the bonds, the value of which was \$10,000, the securities have been recovered. It was believed that they had been buried or destroyed.

That the securities are still in existence is known here. A short time ago negotiations were opened between men said to represent the burglar and President Joseph Bird of the Manhattan Savings Institution for their return.

The burglar has made a demand for \$50,000 and no questions to be asked with the understanding that the securities are to be handed over in good shape and that immediately upon their delivery the money shall be paid in cash.

President Bird, who at the time of the robbery was paying teller of the Manhattan Savings Institution, said to the burglar, "I will not pay you \$50,000 and let you have the securities." The burglar responded, "I will not pay you \$50,000 and let you have the securities."

Continuing, Mr. Bird said: "Many of the securities are worth less than face value, since the government paid for them at a premium."

"I will not pay you \$50,000 and let you have the securities," responded the burglar.

Mr. Bird stated that he believed the offer to be made in good faith.

## WITHOUT HORSES.

GASOLINE CARRIAGE INVENTED  
IN LOS ANGELES.

The Trial Trip Satisfies All the  
Maker's Most Sanguine Hopes  
of Success.

## OVER BAD ROADS OR HILLS.

THE FIRST JOURNEY EARLY ON  
SUNDAY MORNING.

It Carries Enough Gasoline to Run  
from Los Angeles to San  
Francisco.—J. Philip Erie's  
Achievement.

A horseless carriage has been invented and built here in Los Angeles which has proved a success, and which promises to outrival in its ability to travel over bad roads and on heavy grades than all its competitors hitherto invented.

The trial of the new gasoline-propelled automobile carriage took place early yesterday morning, when the streets were deserted except for a few sleepy policemen and wildly-careering milkmen. The trial trip was set for the "we, sma' hours" because the inventor, J. Philip Erie, knew that if it were at any less unearthly hour

neither hills nor rough roads can interfere with its successful working.

The trial was a gratifying success in every way. One car which had been held beforehand was that the machine would scare horses, because of its unique appearance and because of the noise of the gasoline motors and the gasoline engine.

Before the machine was taken from the shop it was not supposed that one of the cylinders, working by itself, would be able to budge the machine. Yesterday morning, however, when the four cylinders were used, but in spite of that fact the vehicle ran with the utmost smoothness and ease. When the four cylinders are used, and that could have been done yesterday morning if it had been wished to do so, the machine will go the rate of twenty miles an hour, without any trouble, and it is believed that, because of the method of its construction,

the trial trip satisfies all the maker's most sanguine hopes of success.

THE MOTOR WAGON.

In appearance the motor-wagon is not unlike a massive tally-ho. The body of the carriage is high above all the machinery, which is enclosed below in a black box. This box is fitted with a fan, driving a perfect ventilation to the engines and preventing any heat from reaching the body of the carriage. The fumes of the gasoline are barely noticeable, being all below and behind the carriage, and nearly all are removed by the device of making the years alternately of wood fiber and steel. The wheels are of steel, with pneumatic tires in which the rubber, being an inch thick, is practically proof against punctures. The only part of the machinery that is visible is a polished copper cylinder under the carriage, and the nickel-plated levers which are used to start and stop the machinery, to operate the steering-gear.

This trial carriage the space allowed for the machinery is much larger than is really required. The extra room was given to facilitate improvements and developments as the work progressed. In the other carriages which will be built upon this model the engine-case will be reduced in size by nearly one-third, thus removing all appearance of bulkiness.

Gasoline, asphalt or oil may be used in the motors of this carriage, and the motor itself is planned for use not only on road vehicles of all kinds, but also on street and other railroads.

Mr. Erie pins his faith to the gasoline motor for road vehicles for many reasons.

Keep  
Well

Easy to say, but how shall I do it?

In the only common sense way—keep your head cool, your feet warm and your blood rich and pure by taking Hood's Sarsaparilla.

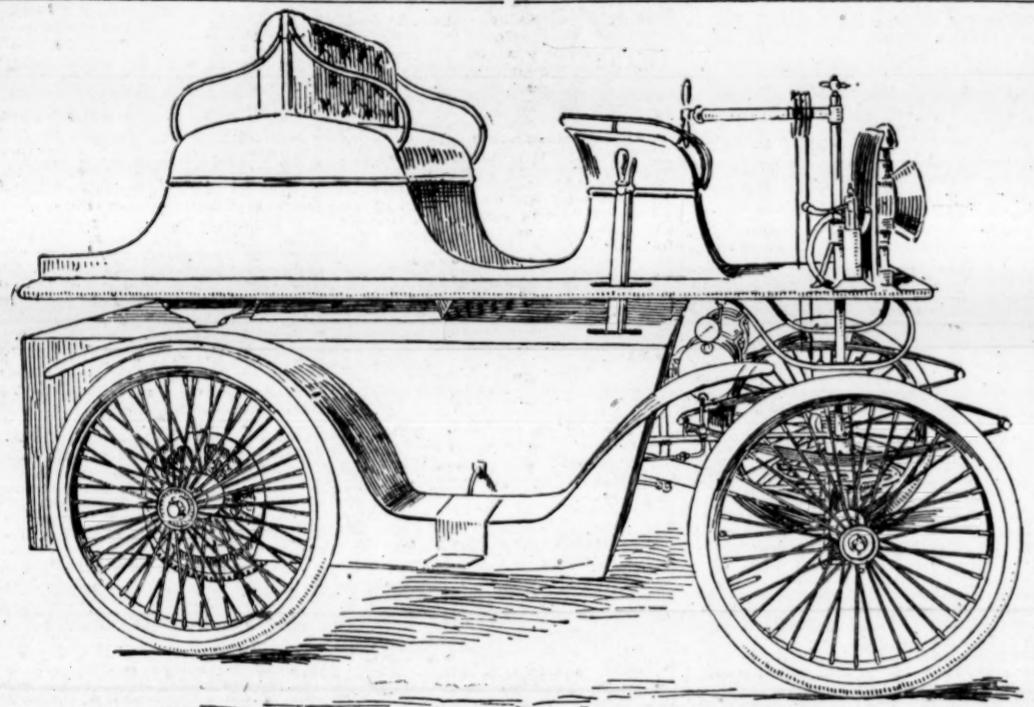

In the Spring Hood's Sarsaparilla builds up the system, creates an appetite, tones the stomach and gives strength. It is the people's Spring Medicine, has a larger sale and effects more cures than all others.

Hood's  
Sarsaparilla

Hood's Pills assist Digestion and cure Constipation. 25 cents.

as to turn the main driving shaft, upon which is mounted next to the rear wheels, a small fly-wheel. Universal joints form the connections of piston-heads and rods. For adjusting the parts for starting, a small crank wheel is arranged in the rear of the carriage. In front of the vehicle and under the body is located the main supply gasoline tank. From this the gasoline is carried in small pipes to

THE NEW MOTOR-CYCLE.

the spectacle would attract a crowd which would interfere seriously with the progress of affairs.

For months Mr. Philip Erie, a wealthy New York citizen, engineer and inventor, who has of late been living in California on account of his health, has been working on his ideas for a motor-carriage. Over \$30,000 has been spent in the experiments. Almost every detail of the machinery had to be invented as the work progressed, and now that the machine is done, it is protected by over thirty separate patents.

At 2 o'clock yesterday morning the work began of getting the carriage out of the shop on West First Street, where it has been built. The carriage was pushed down the long alley, and out on Broadway. The gasoline engine was set to working, the machinery put in motion, and with a twist of the lever the first horseless carriage ever seen in Los Angeles drove off.

Then Mr. and Mrs. Erie and half a dozen guests climbed into the carriage. Down Broadway it moved, around the corner onto Sixth street, along the awful Sixth-street pavement so smoothly that the passengers hardly felt the motion at all, south on Main street for a block, crossing car tracks and chuck-holes innumerable without any trouble, and then down the Seventh-street hill and across the city over miles of mud. The electric carriages manufactured carried sufficient power to run more than twenty miles on a smooth road, while a heavy grade or rough road the power is expended in less than half this distance.

## THE MOTIVE POWER.

The arrangement of the motors and power in connection with this motor-wagon is simple and most effective. The body of the carriage is provided with a rear axle, or main-driving axle, and at the front with two pivoted axles, which are swung on their pivots by means of segments upon the axle,

each cylinder independently, where-through valves specially constructed for this purpose, is sprayed into a casing, and there mixed with air. This vapor is then carried directly into the cylinders. Automatic valves at the head of each cylinder regulate the feed and exhausts. The cylinder is compressed, and the piston reaches the limit of its outward movement, the compressed charge is forced to the ignition chamber and exploded. The ignition tube extends into a casing, having a refractory tube which is situated in a small flame from a suitably-protected burner. The exhaust ports are provided with independent mufflers, so that all noise is practically avoided.

By the arrangement of the engine in line a direct action of one upon the other is secured, with no loss of friction, so that there operates upon the other through the intervention of double cranks of other connections, and the strain upon one is taken up by the other, while the whole structure is made more compact and better balanced than any other engines are arranged, as usual, side by side at one side of the driving shaft.

One difficult incident to the use of gas engines as motors for vehicles has resulted from the large quantity of water, which some cars even use, which it has been necessary to carry in order to maintain the cylinder of the motors at the desired low temperature.

The volume of water in this carriage is reduced to an amount which can

readily be carried without inconvenience by the use of a cooling device for carrying and spraying the water in contact with air over an extended cooling surface.

The motors are mounted on a steel frame, one pair with the fly-wheel located behind the rear axle; the other at the forward end of the steel frame.

The disk and driving gears are located between the motors and in the center of the vehicle below the seats, thus securing a perfect balance.

The steel frame and all machinery is supported by the axles, thus relieving the body of the vehicle of all strain and weight. Motion is transmitted from the main driving shaft to the counter-shafts parallel thereto, by di-

gearing with a gear wheel upon a shaft extending forward to the body of the vehicle, and provided with an operating handle. By this means a shorter turn can be made, and the front wheels can be kept better disposed so as to support the weight of the vehicle, that is, if they were to turn around, as in its center. This handle also operates and sets the friction-rollers for increased power, required on grades, and by a reciprocating movement applies the brake.

The axles are provided with wheels having heavy pneumatic tires, with a hub and bearing. Motion is transmitted from the main driving shaft to the counter-shafts parallel thereto, by di-

rectly by a gear wheel upon a shaft extending forward to the body of the vehicle, and provided with an operating handle. Financial Interests to be Discussed

at Kansas City.

BY ASSOCIATED PRESS WIRE.]

LONDON, May 30.—The weather during last week was never fair and some rain has fallen. The appearance of the wheat is improving and the prospects are better. In the wheat market values were 6d. down on the week, but offers were firm. The decline was due to the weather and to depressing American advices.

It is now nearly two years since the automobile carriage sent out through the city last night began to take shape, first in iron and brass of J. Philip Erie, and then in iron and steel, under the skilled hands of S. D. Sturges, who has worked with Mr. Erie at the machine ever since the first plans were drawn. Another partner in the scheme is C. H. Albers, ex-president of the Merchants' Exchange of St. Louis.

This is the first motor carriage ever built west of the Mississippi River. In all probability it will not be long before a factory is established in Los Angeles for the manufacture of motor wagons.

The machinery is provided with roller

and ball bearings, which require no oil, and practically annihilate friction.

Smaller bearings, not provided, as well as the cylinders, are supplied with oil by an automatic apparatus, which avoids the necessity of oiling each part individually. A similar apparatus controls absolutely the flow of the gasoline, thus doing away with all possibility of any accidents.

### REVENUE DELAYS.

The newest and most startling development growing out of the new revenue act called the Dingley Bill, for the sake of convenience, is the fact that the brewers of the United States are getting ready for a big battle against the proposed increased tax upon beer, which is \$1 per barrel now, and is increased to \$4.44 by the terms of the new bill. The brewers claim that a tax of \$1 per barrel is already 20 per cent. of its value, and that 44 cents added to that would be tantamount to a confiscation of the profits of their outlay. There is no threat you can make against a man so dangerous as to say that you will keep him steadily at work and yet make him work for nothing. That there is a great profit in a well-managed brewery concern, finds exemplifications all over the Union. Christian Moerlein, who died in Cincinnati a few days ago, left an estate worth at least \$1,500,000, after giving away large sums in charity every year; and he came to that city a laboring man glad to get work at \$1 per day, as late as 1852. Other examples are not wanting to prove how profitable the brewery business can be made with good management, but the Moerlein case is the nearest one at hand. If there is any one industry that will bear an increase of taxation of purposes of revenue the brewery business is that one.

The brewers are getting ready for a big fight, and as they have plenty of money, it bids fair to becoming a bitter one. John Hancock of Cincinnati says that "44 per cent. addition will eat up all the profits," and others in that business voice similar opinions.

The Times is not so fearful of anything as of the results that would follow a protracted fight in Congress over this or any like proposition. Every day's delay in the passage of the new revenue act is marked by increased importations of European goods of all descriptions, rushed in to evade the provisions of the new tariff law. It is for that reason, rather than any other, that the new beer tax is dangerous to the country. It keeps the new revenue act in abeyance and gives importers a chance to overstock this country with every variety of foreign goods. The old saying that "delays are dangerous" is as true as when first uttered, and never more so than in the present instance.

The ninth convention of the Trans-mississippi Commercial Congress has been called to meet at Salt Lake City, Utah, on Wednesday, July 14. The session is expected to last four days. The territory embraced in the invitation includes all States and Territories lying west of the Mississippi River and those portions of Minnesota and Louisiana which lie east of it. The object of the Congress is to promote the interests of this vast section. The Governor of each State or Territory is invited to appoint ten delegates, the Mayor of each city one delegate, and an additional delegate for every 5000 inhabitants, no city, however, to have more than ten delegates; each county one delegate, through its executive officer; every business organization one delegate, and an additional delegate for every fifty members, but no such organization to be entitled to more than ten delegates. Mayor Snyder has under consideration the appointment of delegates from Los Angeles.

An Athens correspondent is authority for the statement that after the retreat from Demokos, Crown Prince Constantine attempted suicide. He was responsible for that disastrous rout, his unwillingness to face the consequence is not surprising.

The Cubans are willing to pay a reasonable price for their independence, the Spanish government would be wise to accept the money and let Cuba go. The grip of Spain upon the island will surely be loosened, sooner or later, whether willingly or unwillingly. It is manifest destiny. The existing insurrection is an expensive affair, and Spanish finances are not in a condition to stand the strain much longer. Spain would save

money by selling Cuba.

The Turks have violated the armistice by occupying a position in the neutral zone, and the Turkish army in Thessaly has been strengthened to nearly or quite 200,000 men. Greece has entered a formal protest to the powers. Now, what are the powers going to do about it?

The production of gold, silver, copper and pig iron, the United States leads the world. There are other respects, also, in which the United States leads every other nation on the globe.

It is said that frosts on the nights of May 12 and 13 in the Yonne wine district of France destroyed vines to such an extent as to decrease the wine crop in that region not less than \$4,000,000. As California has plenty of last year's crop on hand, she can sell the French wine-dealers all they may desire to purchase.

### LITTLE JIM'S AMBITION.

If ever there was a man with a plethora of ambition and a poverty of merit, that man is James H. Budd, who, by the grace of a few artists in stuffed ballot-boxes in San Francisco, signs his name, "Governor of the State of California." The anxiety of the little acrobat in the sombrero to give away almost anything asked for at the session of 1895, so long as the applicant would vote against a recount of the vote of San Francisco in several election contests pending in the Assembly, quite explains that matter. Any doubts about that can easily be solved by referring to the Assembly journals for that session.

Now this little gentleman wants to go to the United States Senate. He has either gotten, or expects to get \$100,000 out of the Fair estate as one of the counsel in that famous example of the amended adage which reads that "where there's a will there's a lawsuit." And it is to be supposed that some of this is to be used as a fund for altering the previously fixed convictions of Senators and Assemblymen in the next Legislature. He is now engaged in laying his wires to that intent.

He has his representative here, in the person of H. W. Patton, erstwhile a protege of Senator Stephen M. White. The recipients of gubernatorial patronage in this neck o' woods are selected by Mr. Patton as men who are likely to be useful to Mr. Budd and not to Mr. White, who is in his seat at Washington and battling manfully for the interests of Southern California. If Mr. Patton for one moment imagines that James H. Budd is as strong a man as Senator White, or in any other county outside of San Joaquin, he is woefully mistaken. He might possibly carry San Francisco against him, with the aid of the professional statesmen who aided him against Mr. Estee in 1894, but even that is not certain. It is said by those who are "in the know" that the Governor's water-front business (that of the State Harbor Commission) is being worked for all that is out, in this direction. When Budd first went into office, he insisted that as the port of San Francisco created all the revenue of the Harbor Commission, its appointees must all be taken from that city. Now he has

Maj. Harney in there, and has made that gentleman select appointees from outside counties whose friends can get to the Legislature to aid his election. It is also said that a ministerial creed is being worked for all that is out, in this direction. When Budd first went into office, he insisted that as the port of San Francisco created all the revenue of the Harbor Commission, its appointees must all be taken from that city. Now he has

Monday, May 31, 1897.

## THE WEATHER.

U. S. WEATHER BUREAU, Los Angeles, May 30.—At 5 o'clock a.m. the barometer registered 30.04; at 8 a.m., 29.75. Thermometer for the corresponding hours showed 64 deg. and 68 deg. Relative humidity 5 a.m., 60 per cent; 5 p.m., 71 per cent. Wind, 5 a.m., north, velocity, 1 mile; 5 p.m., west, velocity 7 miles. Maximum temperature, 76; minimum temperature, 53. Character of weather, 5 a.m., foggy; 5 p.m., partly cloudy. Barometer reduced to sea level.

## The Times

ALL ALONG THE LINE.

A San Bernardino boy is said to be building an air-ship, and of course all his friends are sure the thing will fly. His name is not Darius Green, and it is alleged that he is not a San Francisco Call correspondent.

Santa Barbara has another gold excitement, and citizens are staking out claims on the mountain side back of the town with the enthusiasm and lack of judgment that characterize the amateur prospector. Nobody seems to know for sure anything about the value of the ledge that has been found.

A Los Angeles inventor has devised mechanism for propelling vehicles that appears to meet requirements that are not met by the motors that have been applied to carriages elsewhere. The source of power is gasoline, and the motor is powerful enough to propel the vehicle up any grade of a country road. The day of the horse is passing.

The two years' drought in Pomona is broken, and a sigh of relief has been heard at great distances from that thirsty town. It is barely possible that not all the residents of Pomona have suffered acutely from the dry spell, but the public reappearance of beer undoubtedly brings relief to some of them. Pomona is no longer classed as a "desert town."

A distressing thing has befallen the Santa Barbara High School. Senior class day is at hand and the seniors have been hard at work preparing for the exercises of the day. Suddenly an epidemic of mumps—of all diseases the mumps—has broken out, and the members of the class who were most depended upon for the great day have succumbed to the malady.

Yesterday's Sunday race meet at Agricultural Park promises to raise a storm which will not be stilled for many a long day to come. The League of American Wheelmen, a powerful organization, is firmly opposed to Sunday racing. Any amateur who indulges in such a pastime is punished by being ruled off all the tracks controlled by the league for the next two years. More than that, the Agricultural Park track is a black-listed track, and to ride there is a heinous crime against the ethics of the organization. Yesterday a large number of prominent local riders took part in the Sunday meet and as a consequence the league will probably do all its power to make it hot for them.

## DEATH OF J. G. CHAMBERLAIN.

A well-known Figure in Southern California Affairs.

J. G. Chamberlain, general manager of the Los Angeles Iron and Steel Works, a man who was a prominent figure in the life of Los Angeles, died from an attack of stomach trouble and pneumonia at 1 o'clock yesterday morning.

Mr. Chamberlain was born in Ohio. Before coming to California he was in business in various iron and steel works and blast-furnace enterprises in Ohio and Alabama. He came to California some years ago, and started the rolling-mill of the Los Angeles Iron and Steel Works. The enterprise did not meet with success, and a few months ago it closed its doors. This proved a great source of worry to Mr. Chamberlain, and probably shortened his life.

At the organization of the Manufacturers' Association in 1886, Mr. Chamberlain was elected as its president, and served in that capacity until its dissolution in 1888. Mr. Chamberlain was elected vice-president of the new body, and he occupied this position until the day of his death. He was one of the members of the Executive Committee, which directed the course of the Home Industries Exhibition, and the success of the undertaking is largely attributed to his wise counsels.

Mr. Chamberlain leaves a widow and three children, a daughter, Mrs. C. D. Pillsbury of Los Angeles, and two sons, one of whom is here, while the other is now living in Columbus, O. He recently closed out his business there in order to come here to live with the other members of the family.

## UNIVERSITY COMMENCEMENT.

Sermmons Yesterday by Dean Phillips and the Rev. W. Stirring.

Sunday services of the University of Southern California were held yesterday in the Methodist Church, which had been beautifully decorated by the sophomore class. The choir rendered several selections, and Miss Letitia Williams sang a solo.

Dean Phillips preached the baccalaureate sermon. His opening remarks were relative to Memorial Day. The subject of the sermon was "Seek ye First the Kingdom of Heaven." In closing he addressed the graduates with most earnest words. In the evening the annual sermon to the students was preached by Rev. William Stirling, instead of Rev. C. F. Elliott, who announced his text as "All Power is Given Unto Me in Heaven and in Earth." He spoke of the advance in Christianity and the assertion of the power of Christ in the world. He urged the young prophets to place themselves under the influence of this power and to trust their future with Him. At the close of the sermon Miss Williams and Mr. Cogswell sang "The Lord is My Shepherd."

On Tuesday evening the College of Music will hold graduation exercises in the chapel. Thursday morning the regular graduation exercises of the college will be held in the same place. Athena Literary Society will give its annual programme in the Chapel on Wednesday evening.

## That Forged Deed.

The cashier of the Columbia Savings Bank and the secretary of the Title Insurance and Trust Company, state that the forged document which Davis obtained money was not shown to either the bank or the company, but was recorded by Davis before examination of title was made. The records disclosed a perfect title vested in Davis, and the transaction did not differ on its face from dozens made every day.

INCORPORATION sale commences tomorrow morning at Villa de Paris, 221 and 223 South Broadway.

## Society.

Miss Maybelle Rendall gave a breakfast yesterday morning at her residence on Alvarado street, in honor of the Queen of the recent fiesta, Miss Francesca Alexander. The other guests were the ex-minister Frank J. Thomas, the director in the green set of the minut, the Misses Rose Newmark, Alyce Keenan, Christine Kurtz, Meers, Harry Wyman, Henry Newmark and Dr. Williams, Karl Kurtz, Louis Gottschalk and Mrs. S. A. Rendall. The decorations, which were in white and green, were exceptionally handsome. In the center of the table, resting upon a silver-framed mirror, was a large cut-glass punch bowl filled with white roses. From the chandelier to diagonally opposite corners of the table were caught trails of asparagus plumosus, while to the other two corners fell wide satin ribbons of Nile green, terminating in smart bows. The chandelier was shaded in green and wreathed with asparagus ferns, which were fastened with a large bow of the green ribbon. Placed diagonally on either side of the centerpiece were cut-glass candelabra, and these, as well as the four banquet lamps, whose shades were shaded in green. At each lady's place was a long-stemmed white rose, tied with green satin ribbon, and for the gentlemen there were boutonnieres of white carnations and maidenhair ferns. The masks, which were pale green, rough paper, bore in one corner a water-color sketch of a young lady whose costume was an exact copy of that worn by the hostess in the fiesta minut. The hostess herself had executed the dainty decoration. An elaborate menu was served under the direction of Christopher. Music was rendered during the affair by a string orchestra.

Mr. and Mrs. John E. Plater entertained at dinner last evening at their apartments in the Baker Block. The decorations were in France, roses, red and pink satin ribbons. Their guests were Mr. and Mrs. Frank S. Hicks, Mr. and Mrs. O. W. Childs, Mr. and Mrs. Richard P. Blasdale, Dr. Ainsworth and Dr. Bryant.

## IN THE OIL FIELD.

RAILROAD COMPANIES BECOME PRODUCERS OF FUEL.

Encouraging Progress in the Eastern Extension—Water Becoming Troublesome—Cudahy's Well a Failure—General Review.

The present activity in local oil circles is likely to result in extension of the Los Angeles field.

Martin & Dryden have removed their drilling rig to the vicinity of the County Hospital grounds, and report every encouraging outlook. At a depth of 250 feet they have uncovered large quantities of surface oil and are sanguine that their present territory lies within the true oil strata. Their drill is now making rapid progress, and it is expected that within ten days a valuable oil stratum will be found. These producers have expended considerable money and time in exploitation during the past ninety days, and declare that their exchequer is calling loudly for more satisfactory results than have crowned their past efforts.

Boiling for oil in the Cudahy packing-house grounds has been abandoned. Mr. Chandler says large quantities of salt water have been struck at a depth of 550 feet. The drilling rig will be removed from the grounds by his employer, and he has penetrated several feet of oil sand, but the water came in so freely that it was impracticable to try to recover the oil. Fifteen or twenty barrels of oil were baled from the drill hole before the heavy flow of salt water was encountered.

Encouraging reports continue to come in from Whittier and Fullerton. The opinion is expressed by many oil producers that the Santa Fe people will not push development in the latter field further than to ascertain the nature of the extension. The oil companies while oil can be purchased at present prices. Or in other words, that it will be the policy of the company to hold its territory in reserve for contingencies that may arise in the future. Even the oil companies in the eastern development in Southern California, several railway companies have their hands in the petroleum pie. The Los Angeles Railway Company owns and operates no less than seven or eight wells, and the Pasadena and Pacific Railway Company, which now own the fields, two or three oil-producing properties. The Traction Railway Company is also an owner in several oil wells. Moller & Zobelein, the big brewery operators, are also the owners of several good wells. From all showing it is evident that the big oil consumers occupy a rather conspicuous position as oil producers.

Mr. Chadwick of the new syndicate that has leased nearly six acres of oil land from Mr. Darcy, says he and his associates will start drilling on the property at once, and that it is their intention to drill at least fifteen wells along the exterior boundaries of the property. This work will protect the oil strata from the encroachment of others. The interests will be drilled in the places of those indicated.

The boiler and other drilling machinery recently hauled to the vacant lot at the southwest corner of Beaudry avenue and Angelina street, have been removed, and it is reported that one of that property in contemplation have abandoned all intentions of drilling for oil at that site, fearing failure to secure oil, similar to the experiences of Edward North on Temple street, only a few hundred feet distant from the proposed ground of exploitation.

## AT THE WEST POINT.

But three new wells were added to the Western extension during the last week. One of these is owned by the Tux Bros., and is situated near the southeast corner of Bonnie Brae street and Ocean View avenue. It was finished at a depth of about 1250 feet, and promises to become a heavy producer. The second well is being drilled in the latter part of the week, and the pump is now in motion. A second well is situated a few feet further east, and is the property of the Pennsylvania Oil Company. There is a good showing of oil in the drill hole. Drilling operations were suspended at a depth of 400 feet. The third well referred to is situated 300 feet west of Burlington avenue, on the north edge of the strata, and was drilled to a depth of 950 feet. The work was done by O'Donnell & Whittier. The tubing was put in Saturday. There is a fair showing of oil in the well.

More satisfactory progress is being made at the site of C. V. Hall's new well, on the east side of Bonnie Brae avenue, 400 feet south of Ocean View avenue. The driller has reached a depth of 1000 feet, and there is a good showing of oil in the well.

Sloan & Leslie's "water well," situated at the southeast corner of Burling and Ocean View avenues, has been temporarily closed. The owners are pulling the casing, and will return it to some new site. They have intimated that after the well has "rested" for two or three months they may make a further attempt to shut off the water. Some of the oil men, however, report that the well was neither permanently nor effectively "plugged" without further temporizing. Had the well been absolutely abandoned, these interested producers would have drilled another well in the same place to a point that would have assured no further flow of water upon the oil strata. It is alleged that in the East the owners of "water wells" are compelled by State law to touch off each well when it is discovered to be in excess of former production properties. The oil industry in this State has hardly passed its infantile stage, but there is no doubt that the State's legislators will soon call for the enactment of protective legislation along the lines that experience has demonstrated to be necessary for the encouragement and perpetuation of the industry.

The week the Richard Green Crude Oil Company and Scott & Lottus will each add a new well to that portion of the oil field lying near the Union-avenue and Franklin grounds. The Rex Oil Company may also tube a new well in the quadrant.

Young & Shaw are making preparations for early drilling of a second well west of Bonnie Brae street, north of Ocean View. A new well will also be drilled in this locality by the Rex Oil Company. The American Crude Oil Company is making rapid progress at the site of its new well in the immediate vicinity.

The Richard Cudahy Oil Company has erected a derrick near the Trafon property and will begin drilling operations this week.

O'Donnell & Whittier have abandoned the site of the Richard Green Crude Oil Company's new well, in the quadrant, near the junction of the small cañons. A heavy flow of salt water was encountered at a depth of 1000 feet. A new derrick has been erected near by, and a second well will be drilled. A good body of oil was uncovered before the water flowed in. After "packing" has settled for a few weeks the property will be tubed and it is expected considerable oil will be recovered.

## ESTERN EXTENSION.

The eastern extension of the local oil field has made such remarkable progress during the past sixty days that it is now a respectable district of

## Right in the face

of all these old prejudices and false ideas in favor of soap, see what Pearline has done.

Hundreds of millions of packages have been used! That shows it. Probably there never was another household article that came into general use so rapidly, so wonderfully, and from the very start, too.

You see, women were ready for it. Most of them were tired to death of wasting their time and strength and money with needless and ruinous rubbing. It hasn't taken them long to prove to themselves that Pearline is easiest, quickest, safest, most economical, in all washing and cleaning. Every woman can prove it.

## Consumption Cured

"Treatise on Consumption" sent free to any address.

DR. W. HARRISON BALLARD, 406 Stimson Blk, Spring and Third Sts., L.A.

Itself, no less than twenty-seven oil derricks towering over city lots that were devoid of especial interest or known value, and the age-old conservative estimate would probably place the present monthly output of this section at 10,000 barrels. Drills are at work in six new sites and the machinery is being put in at as many more. In fact, the eastern field has just been closed between Brock & Chadwick and the Branson brothers. A value of \$35,000 was placed upon the property referred to, consisting of nearly six acres lying on the east hillside, west of Adobe street, and abutting the oil company's the Slocum Oil Company on the northeast. The preliminary work of developing this property has already begun. The lessees are practical oil men, and intend drilling a number of wells as soon as the work can be done. No drilling has yet been started upon this property, but the presumption is that no petroleum rock underlies the entire tract.

A good showing of surface oil has been uncovered in the Tubbs well at depth of 700 feet. This property is located 400 feet east of North Pearl street, and the lease is held by the Slocum Oil Company on the northeast. The preliminary work of developing this property has already begun. The lessees are practical oil men, and intend drilling a number of wells as soon as the work can be done. No drilling has yet been started upon this property, but the presumption is that no petroleum rock underlies the entire tract.

The Slocum Oil Company has started the drill in a new well on College street 400 feet west of Adelphi street. This company has also erected a derrick for well No. 7, on the south side of College street, nearly opposite the above site.

Turner Bros. have tubed their new well in this section of the field. It is a good showing of oil, but may not remain long clamped to the best oil producers of the eastern extension.

The sledge well of Edwards, Gleason et al., near the brickyard, has been drilled to a depth of 650 feet, and the driller makes the somewhat remarkable claim that they are twenty-five feet below the oil strata.

Dr. Taylor is recognized as a gentleman of splendid educational and literary attainments, having practiced medicine thirty-four years, and having given out (nervous prostration and general debility) about five years ago. Travel and medical assistance seemed to do him no good and he was in a serious condition when he came to the English and German Expert Specialists. He has been greatly improved in health and is able to continue his teaching and educational work. The doctor will be glad to have interested people call at his home, 37 Crocker street, where he will be pleased to relate his fortunate experience with the English and German Expert Specialists.

Dr. John Emerines, a graduate of two famous European medical colleges and for thirty years a leading physician of Denver, Colo., comes to the English and German Expert Specialists and is cured.

## RESULTS

## SPEAK LOUDER THAN WORDS.

It is the Duty of Every Afflicted to Investigate the Ability of His Medical Adviser Before he Trusts Him with His Health and Happiness.

The English and German Expert Specialists urge and request the afflicted before they come an consult them, to write to or talk with some of the thousands of patients they have cured. Ask them what they have done for them. Many of them are your neighbors and those that live at the distance will only too gladly answer your letter of inquiry, for many grateful patients, after they have been relieved of their sufferings, have sent thousands of other patients to the English and German Expert Specialists.

Among the cured and happy patients are many general practitioners who can't afford to pay high fees, the ability of the English and German Expert Specialists, for the services they sought for, so long in vain, namely health.

The following noted medical men, graduates from foreign lands, esteemed and respected by their neighbors, speak as follows of the English and German Expert Specialists, and will gladly give you their opinion, whom to employ if afflicted with chronic diseases, if you will take the trouble to call on them at the addresses given below.

DR. T. B. TAYLOR.

The Gifted Author, Linguist, Teacher, Scholar and Physician, Comes to the English and German Expert Specialists for Help.

# SOUTHERN CALIFORNIA NEWS

PASADENA.

MEMORIAL SERVICES HELD AT THE CHURCHES.

The Madrigal Quartette Will Sing at the Newsboys' Concert—News of the Scientific Expedition Now at San Clemente—Rumor About Hotel Green.

PASADENA, May 30.—[Regular Correspondence.] Services were held at many of the churches today, commemorative of the heroes who fell in defense of the flag. The patriotic organizations of the city attended in a body the morning service at the Presbyterian Church, representatives being present from John Godfrey Post, G.A.R., Sons of Veterans, Woman's Relief Corps, and the Ladies' Aid Society. An eloquent sermon was delivered by Rev. N. H. G. Flife, his theme being the lessons to be drawn from Memorial day.

While the formal programme of memorial exercises is to be observed tomorrow (Monday), many people visited Mountain View Cemetery today to decorate the graves of the soldiers buried there.

THE MADRIGAL QUARTETTE WILL SING.

The concert for the benefit of the Newsboys' Home, which is to be given at the Los Angeles Theater on June 14, will have a special attraction for Pasadena people, inasmuch as the Madrigal Quartette of this city will take part. The quartette consists of Misses Elizabeth D. Jones, Grace Longley, Alice Eaton and Katherine Scudder. They have won enthusiastic admiration wherever they have sung, and their singing will prove an attractive feature of the concert. Miss Eller Beach Yarn has also consented to sing, and other well-known voices will be heard. The entire proceeds of the concert will be used for the benefit of the Newsboys' Home.

BACK FROM SAN CLEMENTE.

Harry D. Gaylord, one of the members of the expedition sent out under the auspices of the Academy of Sciences, returned this morning from San Clemente Island. The other members of the party are still at the island, where Gaylord will remain with them a few days, having come back to Pasadena only to be present at the exercises of Memorial day. Santa Barbara Island and San Nicholas Island were visited by the party, and at the latter many interesting Indian relics were found. Three species of shells were collected, but not discovered. The expedition is meeting with much success in its researches, and Mr. Gaylord speaks with enthusiasm of the work already accomplished.

AN INTERESTING RUMOR.

It is rumored, apparently on good authority, that after this year Hotel Green will be open all the year round, in summer as well as winter. While the hotel closed early this month, there were a number of guests who desired to remain in Pasadena during a part or all of the summer, and they were obliged to find accommodations in the boarding-houses or private families. The number of tourists has increased every year, and there is little room for doubt that if Hotel Green should remain open it would be well patronized. Many summer tourists would visit Pasadena who now stay away because of the cold. Their advent would do much to rouse the city from its summer lethargy.

PASADENA BREVITIES.

The members of the Madrigal Quartette, Misses Elizabeth D. Jones, Grace Longley, Alice Eaton and Katherine Scudder, members of the Amphon Quartette, C. N. Chambers, H. E. Earle, H. M. Grimes and J. W. Kinnroth, together with Miss Ballance, Herbert L. Smith and others, will picnic at Devil's Gate tomorrow (Monday).

The directors of the Board of Trade will meet Tuesday morning at 9:30 o'clock. The most important matter to be discussed will be the forthcoming souvenir book of Pasadena.

The sacred concert at the Universalist Church this afternoon was well-attended.

The Reed Council will meet this week on Tuesday afternoon instead of Monday.

Colin Stewart left this evening for his ranch in Kern county.

Cycling cloth, 12½ cents, Bon Accord.

SANTA MONICA.

Memorial Day Services—Electric Line Extension.

SANTA MONICA, May 30.—[Regular Correspondence.] Members of Fort Fisher Post, G.A.R., and the Woman's Relief Corps, attended special services today at the opera house, where Rev. Mr. Maynard preached a memorial sermon. Tomorrow (Monday) at 2 p.m. all will assemble at the opera house and repair thence to Santa Monica Cemetery for the decoration of the graves of the soldier dead. At 8 p.m. there will be an address and other appropriate exercises at the opera house.

The board of regents of the State University has at last made provision for the maintenance of the Forestry stations here and at Chino. They will be supported during the year from the general fund of the university.

Cars are making regular trips over the extension of the Pasadena and Pacific local line in this city, work on which was begun Monday, May 24. Conductor Ross Barrackman has been transferred from the main line to the local. Conductor will run every half-hour from Montana avenue down Third street to Oregon, and then thence to and around the loop on the South Side.

The Children of the Cahuenga public school to the number of 140, held a picnic on the beach on Saturday.

The report of the supervising principal of the public schools of this city for the month of May, shows the average daily attendance for the month to be 5.7 greater than for the same period last year, and the total enrollment of pupils to exceed that of last year by 57.

Pupils of the seventh grade of the public schools rendered an interesting programme on Friday under the direction of Miss Diana Carrillo, president of the school.

W. S. Vawter is putting out a lemon orchard of 400 trees in the suburbs of South Santa Monica.

T. F. Bunnell and wife will leave on Tuesday for their former home in Lafayette, Ind., to remain until October.

T. M. Miller, L. M. Holt, J. B.

Green and Mr. and Mrs. C. E. Harrington of Los Angeles; W. H. Clark, Paul; Mrs. J. S. McLean, City of Mexico, are guests at the Hotel Jackson.

SANTA BARBARA COUNTY.

Memorial Sermon—Hunting Gold in the Hills.

SANTA BARBARA, May 30.—[Regular Correspondence.] The officers and members of Star King Post, No. 52, G.A.R., mustered at their hall at 7 o'clock this evening, and marched in a body to Grace Methodist Episcopal Church, where a memorial sermon was preached by Rev. Mr. Dimmose of Unity Church. The church was crowded to the doors. The minister held the audience in an intensely interesting discourse on the religious and patriotic sentiments, which ran through the entire discourse.

Tomorrow morning the comrades and friends will proceed to the cemetery to decorate the soldiers' graves. They will go to Plaza Del Mar in the afternoon, with a literary programme will be rendered.

The gold excitement has stirred Santa Barbara again, and many are in the hills today, staking out claims. More than fifty claims have been staked out on the range back of town in the past two days. These claims have traced a gold-bearing quartz ledge from a point in Smith's Cañon back of Golita, down the coast range to Carpinteria. They say it is well up the mountain side, and has always been considered for sand gold. The outcropping ledge is from a half-inch to four feet wide, and is very much decomposed, showing free gold in quantities ranging from a few dollars to \$50 a ton. Mr. Coates of this city, who spent last night on the ledge, claims to have made a claim that would assay \$200 a ton. Like all other rumors, the substantiating facts are still wanting.

STARTING IT RICH.

A former citizen of the town at work on the project—News from the Mines—Preparations for Bryan's Coming—A Funeral.

SAN BERNARDINO, May 30.—[Regular Correspondence.] The latest in airdaship is the invention of a San Bernardino boy, M. G. Forna. His name suggests the last half of the name of the Golden State, yet he was born in Nevada. He came to this city with his parents when quite young and lived here many years, attending school.

Even then he occupied his mind with the preliminary suggestions of flying machines, which shows that the idea has grown with his growth. The nearly-perfected machine is the outcome of his studies when attending school here. His mother is now here on a visit to the grandmother, Mrs. Mary F. Smith, who had been a resident from the early days of San Bernardino. The inventor of what promises to be a successful attempt to navigate the atmosphere is Frank A. Vice-President of the Sweeney-Davenport Manufacturing Company, which is building the strange air craft at Grand Island. He hopes to pay a visit to his boyhood home by the new line before the summer is over.

He hopes to pay a visit to his boyhood home by the new line before the summer is over.

STARTING IT RICH.

Thirty years ago Holcomb Valley supported a mining camp of a thousand or more people, and those good old days are still to return. The Green Lead, owned by Los Angeles men, but leased and worked by Morris, Dickey and Simmons of this city, is coming to the front as a gold producer. After it had lain idle for years, the new lessees put in a force of men upon a contingent fee of securing their pay from the work, and the force of miners who were doubtful of any returns, the tide has turned. They have gone down eighty-five feet farther and are in a rich four-foot vein of gold-bearing quartz. They have a ten-stamp mill in operation, and are putting in a new host that will double the American Girl and Mariposa mines.

GOOD MINES.

The American Girl and Mariposa mines, just east of the Green Lead, are in excellent ore, down forty-seven feet, and running \$30 to the ton. At a location south of the Green Lead a 154-foot tunnel strikes the ledge, and a drift for thirty feet along the ledge shows rich ore. The Valley Gold Company has been reconstructed and dependent on the work of the miners at once. W. S. Arnold, president of Los Angeles Alta Planing Mill Company, is personally superintending the putting-up of a two-stamp mill at the Lucky Bill mine, of which he is partner. He has seventy tons of ore on the dump. The Cleveland mine adjoining the Lucky Bill is down twenty-five feet in a rich vein that goes \$100 to the ton.

TO BE OR NOT TO BE.

There is a mystery surrounding the movements of W. J. Bryan, more deep than enlists the peculiar doctrines which he preaches. He was to have come through here July 5 at 6:30 a.m.; then it was changed to Saturday, July 3, and the program was postponed until a three-days' festival will be held on the 28th. Bryan is the first attraction to wind up Monday with a day of sports at the Athletic Club. Now there is another change, and Bryan is booked for Friday—the unlucky day—July 2, and the program is given that he may appear if a man makes a speech and start the "liberty ball" as rolling. Should this be a fixture, and the band play the "Liberty ball" as rolling? Should this be a fixture, and the band play the "Liberty ball" as rolling?

SAN DIEGO COUNTY.

Southern California Railway Will Make a Depot Park.

SAN DIEGO, May 30.—[Regular Correspondence.] General Manager Nevin of the Southern California Railway says that on May 31 work will begin on improving this station with a park containing lawns, tropical plants and trees, etc. The station here will be changed, and the present baggage rooms will be converted into ticket offices and waiting-rooms. The Council has granted the company the desired franchise for a Y on Twenty-second street, and the city shows a spirit to cooperate with the railway company for mutual benefit hereabouts.

FUNERAL BELLS TOLL.

The funeral obsequies of Oscar D. Foy and T. M. Parsons Sunday afternoon called forth the largest attendance witnessed here on such an occasion for many a day. They were both very popular and well-known men.

The Native Sons took charge of the services of the former, while the Baptist Church failed to accommodate him, so he was laid out in a casket which a portion of those called together to pay their last respects to the latter.

SAN BERNARDINO BREVITIES.

Mrs. R. V. Hadden has accepted an invitation to read a paper at a society meeting in Los Angeles in June. Her subject will be "Swing Back the Gates."

C. S. Cornell of Los Angeles will resume the work at the rehearsals of the Hallelujah Chorus Saturday night after his recent severe illness.

The City Hall furnishings have been moved to their new quarters and the Board of City Trustees will meet in the new quarters Tuesday evening.

JUDGE OSER, CITY CLERK DISSES ASSISTANT CLERKS.

Judge Oser, City Clerk Diss, Ass't Clerk, etc. to Anna Earle Steddon, Mrs. B. Necham's subdivision in 28th & R. \$100.

Lizzie Freymeyer et al to Thomas McDowell, lot 19, block 3, Pomona Heights addition, Pomona, \$350.

E. Baker et ux to G. A. Flood, lot 9, block 1, Park tract, \$150.

A. W. Moore et ux to the Loma Vista Ranch Company, lot 18, block 32 and lot 42, block 68, townsite of Howard, formerly Rosecrans \$100.

REAL ESTATE TRANSFERS.

SATURDAY, May 29, 1897.

(Figures in parentheses, unless otherwise stated, give volume and page of miscellaneous records containing recorded maps.)

Lillian Sturge to G. Hamilton, lot 54, block A. A. Painter's subdivision, 100 ft. E. Painter & Ball tract, Pasadena, \$150.

H. G. Wilshire et al to Elizabeth H. Howard, lot 5 and the southwesterly 25 feet of lot 4, block 2, Wilshire Boulevard tract, \$350.

E. Baker et ux to G. A. Flood, lot 9, block 1, Park tract, \$150.

A. W. Moore et ux to the Loma Vista Ranch Company, lot 18, block 32 and lot 42, block 68, townsite of Howard, formerly Rosecrans \$100.

MEMORIAL DAY.

Vickery Post, G.A.R., and the Woman's Relief Corps, today attended the Unitarian Church, where Rev. U. G. B. Pierce gave a Memorial-day sermon. Appropriate services have also been held in the other churches, and tomorrow (Monday) the regular exercises of Decoration day will be held.

SACRED CONCERT.

Mr. and Mrs. C. E. Harrington, Grace Longley, Alice Eaton and Katherine Scudder, members of the Amphon Quartette, C. N. Chambers, H. E. Earle, H. M. Grimes and J. W. Kinnroth, together with Miss Ballance, Herbert L. Smith and others, will picnic at Devil's Gate tomorrow (Monday).

THE MADRIGAL QUARTETTE WILL SING.

The concert for the benefit of the Newsboys' Home, which is to be given at the Los Angeles Theater on June 14, will have a special attraction for Pasadena people, inasmuch as the Madrigal Quartette of this city will take part. The quartette consists of Misses Elizabeth D. Jones, Grace Longley, Alice Eaton and Katherine Scudder. They have won enthusiastic admiration wherever they have sung, and their singing will prove an attractive feature of the concert. Miss Eller Beach Yarn has also consented to sing, and other well-known voices will be heard. The entire proceeds of the concert will be used for the benefit of the Newsboys' Home.

BACK FROM SAN CLEMENTE.

Harry D. Gaylord, one of the members of the expedition sent out under the auspices of the Academy of Sciences, returned this morning from San Clemente Island. The other members of the party are still at the island, where Gaylord will remain with them a few days, having come back to Pasadena only to be present at the exercises of Memorial day. Santa Barbara Island and San Nicholas Island were visited by the party, and at the latter many interesting Indian relics were found. Three species of shells were collected, but not discovered. The expedition is meeting with much success in its researches, and Mr. Gaylord speaks with enthusiasm of the work already accomplished.

AN INTERESTING RUMOR.

It is rumored, apparently on good authority, that after this year Hotel Green will be open all the year round, in summer as well as winter. While the hotel closed early this month, there were a number of guests who desired to remain in Pasadena during a part or all of the summer, and they were obliged to find accommodations in the boarding-houses or private families. The number of tourists has increased every year, and there is little room for doubt that if Hotel Green should remain open it would be well patronized. Many summer tourists would visit Pasadena who now stay away because of the cold. Their advent would do much to rouse the city from its summer lethargy.

PASADENA BREVITIES.

The members of the Madrigal Quartette, Misses Elizabeth D. Jones, Grace Longley, Alice Eaton and Katherine Scudder, members of the Amphon Quartette, C. N. Chambers, H. E. Earle, H. M. Grimes and J. W. Kinnroth, together with Miss Ballance, Herbert L. Smith and others, will picnic at Devil's Gate tomorrow (Monday).

## City Briefs.

J. Scott Oliver, managing principal of the Interstate Detective Service, desires to publicly thank one John P. Elms, who, styling himself as "pro-prietary" to the firm of Oliver and Associates, volunteered the statement in yesterday's Times, that he was in no manner identified with the Interstate Service. If the impression has heretofore existed that the said Elms was ever, directly or indirectly, connected with Oliver and Associates, it is to be regretted that publication will afford to be grateful for his timely correction of the unfortunate error. The principals of the Interstate Detective Service are very proud of the reputation, both at home and abroad, of their institution, which, as an institution, has never violated the feelings of the public at large, because of the impositions of those who would seek to advance their interests through its prominence.

The one-mile open, professional race was won twice by W. B. Vaughn of San Diego, on a Hoffman bicycle, in 2:12½ minutes yesterday.

Opening—Mrs. E. C. Bassett will open her Art Embroidery Parlor in the Emporium, corner Spring and Third street, on Saturday evening, May 29.

Good values in all departments, but tomorrow see display in window with prices of dress goods in novelties. Coulter Dry Goods Company.

A delightful vacation at Catalina Island, from \$10 expense, is worth having. See Hamill & Marsh about it at No. 120 S. Spring.

C. D. Howry forwarded the remains of M. C. Beymer to Clyde, O., yesterday for interment.

Van Storage Co., Tel. Main 1140.

There are undelivered telegrams at the Western Union Telegraph Office for Flora Peacock and J. D. Burrows.

Charles Darris, a laborer out of employment, was arrested by Officer Stewart early this morning and charged at the City Prison with petty larceny. He is accused of stealing several suits of underwear from an acquaintance, Nelson Evans.

Antonio Ruiz, a Mexican, was arrested on Buena Vista street by Officer Rico this morning and held for examination by the Insanity Commissioners.

The prisoner has been acting in an eccentric manner for some time and the arrest was made at the instance of his friends.

## NEW MEXICO NEWS.

## THE SANTA FE ALLEYS THE DISTRESS OF ALBUQUERQUE.

## Elopement on a Railroad Velocipede—Incidents of an Indian Siege Recalled in Land Grant Trial—Interesting Items of News.

ALBUQUERQUE (N. M.) May 28.—(Regular Correspondence.) The transfer of officials of the Santa Fe system from here to Los Angeles naturally excited considerable uneasiness as to the intentions of the company. A committee of the Commercial Club wrote President Ripley asking as to the policy of the road so far as it would concern Albuquerque. To this President Ripley replied:

"Nothing is further from the intention of this company than to do anything which it can consistently refrain from doing in justice effect the interests of any town along its lines, and nothing is contemplated which, in my judgment, will have any deleterious effect upon the city of Albuquerque. It is true that our plans contemplate the removal to Los Angeles of many of the officers of the old Atlantic and Pacific Railroad, who up to 1887 were identified with the growth and development of the property of Leontine. In the early part of 1887 he went South and became connected with the development of Alabama and Virginia. In 1882 he came to Los Angeles and has since that time made Los Angeles his home. A man whose life was made up of acts of kindness and charity. Many today filling positions of honor and trust in the community, who had yet had years of usefulness before him, his work was done and he sleeps the untroubled sleep of the just. His simple, unspent life is left, a benediction to lighten the sorrowing hearts of those whose loss none can measure."

VIENNA, May 30.—The Austrian Derby was run today and won by Baron Oppenheimer's Sapphyr.

DEATH RECORD.

CHAMBERLAIN.—At his late residence, No. 239 West Twenty-fourth street, on Sunday morning, May 30, 1897, J. G. Chamberlain, aged 67, died. Mr. Chamberlain had resided from residence, Tuesday, 3 p.m. Mr. Chamberlain was from old New England ancestry, though he had resided in the West and South. From the founding of Leontine, O., up to 1887 he was identified with the growth and development of the property of Leontine, who developed the property of Leontine. In the early part of 1887 he went South and became connected with the development of Alabama and Virginia. In 1882 he came to Los Angeles and has since that time made Los Angeles his home. DAISY BELL UP TO DATE.

Daisy Bell up-to-date is a belated woman and the mother of three children, and the "cut rates" she has been superseded by a railroad biplane. William Aubrey is, or up to a very few days ago was, a section boss at Whitewater. He cashed his month's pay-check, and that of the Mexican section crew, and, being half crazy for the love of Miss Gosney, the station agent's wife, he got her consent to elope, telling her that she would look sweet on the back of a railroad velocipede built for section bosses. She concurred and the couple rode that night, miles. Then they took a carriage and went across country for the Southern Pacific taking the train at Gage, and they were seen no more by friends or family.

A MUCH-CLAIMED GRANT.

Pending a hearing in the Court of Private Land Claims, for 200,000 acres in Valencia and Bernallillo counties, it is an interesting affair. The grant was made in 1800 by the King of Spain to thirty hardy settlers, conditional on their building a town and fortifying it. This they did, and frequently they were harassed by Indians, who, in those days, had a tribe bearing very different relations toward the white race from what they do today. In 1804, an immense number of Indians laid siege to the town. The Indians were determined, on this occasion, to extirpate the settler. They brought with them thousands of balls of pitch taken from the pine trees, with which to burn the town. For days and nights the siege lasted, and at last the Spaniards appeared to be worn out, when a brave young chief started to climb the top of the gate of the "garita" or watch tower, and, in order to open the gate to admit the savage horde. The Indian had hardly taken a step when Antonio Romero, the grandmother of Hon. Roman A. Bacar, let loose a mighty broadsword on top of his head and killed him. This event discouraged the Indians, and they finally left, leaving many a warrior dead. Today the grant has 500 claimants. During the examination of witnesses, one gentleman, over 60 years of age, stated he was a remarkable man. He gave while on the stand 214 family names with relationships, going back over a period of a great many years. Reference to the papers on file showed him to be correct in every statement.

NEW MEXICO BREVITIES.

A plucky woman is Mrs. M. M. Chase of Cimarron. A wildcat made a leap for her. Mrs. Chase caught the brute about the neck and choked it to death. She was not injured on the hands and arms. Of course, the wildcat was a very large one.

A single keg of a wagon-load of twelve kegs of powder exploded at the Crown Point mine. The occupant of the house, E. E. Seymour and Charles Anita Bustamante, were blown fifteen feet into the air, and somewhat burned.

E. Callahan, formerly of Albuquerque,

was engaged in mining in Durango, Mex., was attacked by bandits and severely wounded. His partner was killed.

A red-hot poker is not a proper auger for tapping a barrel of whisky. At least, so is the experience of Charlie Winn of Clayton. The explosion of gas that ensued injured him severely. The new Mayor of Albuquerque proposes to do something more practical than to write poetry about the fire bell, that having proved ineffectual. It will have an original kind of alarm system of a series of dynamo alarms about the city. These will connect with a "mocking bird" whistle, letting loose a shrieking siren that will give an alarm to living, but probably have surprising effects on the dead. The sirens will be strung on a local telephone company's poles, that being one of the conditions of the franchise.

New Mexico has a very creditable mineral exhibit at the Washville ex-

position, both at home and abroad, of their institution, which, as an institution, has never violated the feelings of the public at large, because of the impositions of those who would seek to advance their interests through its prominence.

The one-mile open, professional race was won twice by W. B. Vaughn of San Diego, on a Hoffman bicycle, in 2:12½ minutes yesterday.

See Williamsons, 227 South Spring street, about the Hoffman.

Edward M. Biggs of the Burns-Biggs Lumber Company, who was im-

prisoned by the Santa Fe court for cutting timber on government lands, has been pardoned by President McKinley.

The lamb crop is said to be generally the best seen in New Mexico in fifteen years.

At Las Vegas two tramps refused to work and were Sheriff's men sent out for five days. Then the Sheriff gave in and the tramps get three square meals a day now, and they are not working any, either.

Engines Nos. 20 and 25 ran into a washout at the old adobe nineteen miles south of Durango a few days ago. They are still there.
